MEGATRON AG

CAD PORTAL

FOR COMPONENTS
MADE OF HIGH-
PERFORMANCE CERAMICS

SELECT → DOWNLOAD → CONTINUE WORKING

All standard components made of our high-performance materials are stored in our CAD portal and can be downloaded in all common formats. You can then integrate the CAD models directly into your design.

Some of our products, such as our ModulMaster and our positioning pins, can even be configured online. By entering the selectable parameters, a CAD model is created that meets your exact requirements.

The comprehensive CAD portal contains the following DOCERAM products, among others:

- Pick-up bolts
- Insulating bushings
- ModulMaster Welding Fixtures
- Positioning and cylindrical pins

You can reach the portal at:
doceram.partcommunity.com
